

# **IHS Integrated Diabetes Education Recognition Program Sample Materials**

## **INTRODUCTION**

The following sample materials are provided for sites that are in the process of developing a quality diabetes program and/or considering applying for Indian Health Service (IHS) Integrated Diabetes Education Program Recognition. They are intended to provide ideas and templates for wording and formatting of some diabetes education program documentation.

The sample materials included here are copied or modeled from diabetes education programs that are fully accredited by the IHS Integrated Diabetes Education Recognition Program. Team members need to discuss and revise these samples for use in local programs.

These samples are not meant to be all-inclusive; they represent only some of the documentation that diabetes education programs need to complete. Please contact the IHS National Diabetes Program at 505-248-4182 if you have questions about documentation not included here.

Sites are encouraged to review the IHS Integrated Diabetes Education Recognition Program Manual (blue book) to learn more about the standards, review criteria, and requirements for IHS Integrated Diabetes Education Recognition.
